SHARES ARE VERY DULI

ABORTIVE BULL MOVEMENT OF FRI-DAY LOST AMID STAGNATION.

Better Tone of Wheat and Cotton Crop Reports Helped Stocks in Late Dealings-Local Trade Situation.

AtaNew York, Saturday, prime thercantile paper was 3%@4% per cent.

Sterling exchange was steady, with actu-

al business in bankers' bills at \$4.86% for demand, and \$4.83% for sixty days; posted rates, \$4.841/204.85 and \$4.871/2; commercial bills, \$4.83@4.8314. Bar silver was 614c; silver certificates,

611/2@62%c; Mexican dollars, 481/2c. At London, silver bars were steady at 281/4d an

The weekly statement of the associated New York banks, issued Saturday, shows the following changes: Surplus reserves, increase......\$1,332,525

cie, decrease 455,500 egal tenders, increase..... 193,800 Deposits, decrease 2,733,300 Circulation, increase 91,600

The banks now hold \$16,859,376 in excess of the requirements of the 25 per cent. rule. Saturday's New York stock market showed clearly that operators in shares have resigned themselves to a period of waiting and duliness. following the abortive bull movement Friday. Dealings were on an insignificant scale and the market was almost immovable during the greater part of the session. The drooping tendency in the wheat and cotton markets had the effect of stiffening quotations for some of the railroad stocks which opened depressed on the score of probable crop damage. Prices had dropped back somewhat when the appearance of the bank statement caused some covering by room shorts. The movement was, however, so feeble that there were some recessions, making the close irregular and very dull. The loan item of the bahk statement confirmed the forecast of these dispatches that the liquidation of sterling loans was probably keeping pace with the demand for new oans in providing for the July 1 settlements. This is the only possible explanation for the decrease in the loan account of \$1,557,300. The increase in cash of \$649,200 also fulfills the expectation that some of the week's requirements for cash had already been anticipated in last week's bank ment period thus comfortably tided over. the confidence is reasonable that the dissursement, after July 1, of the large divi-

coming ease in money and continued firm, saturday, as it has been all week. Prices of stocks are generally higher. after a week of great irregularity and varying fluctuations. The buying has come, to a large extent, from the short interest, and there has been no evidence of sub stantial investment buying. Bonds have een firmly held and have advanced on a small volume of business. United States reinding twos, when issued, advanced 1/4. and new fours declined 14 in the bid price. Following are Saturday's share sales and the closing bid prices:

dend and interest payments will insure an

adequate supply of loanable funds to meet the coming demands for the crop move-

better index than the stock market of the

LOCAL GRAIN AND PRODUCE.

The Business of June, as a Whole, Satisfactory in Volume.

Saturday closed the trade for the month of June, and in most lines it has reached expectations, and in some exceeded the volume looked for. This remark will apply to the wholesale grocers, the druggists, the iron and hardware merchants and produce and provision handlers. In lines where trade in June is expected to be light merchants report their trade fully as good as in June, 1899. Co Commission row the trade of the month was much more satisfactory than in June, 1899, as there was a large supply of fruits and early vegetables, and prices were so reasonable that the products, if good stock, were readily disposed of, and less fruit of the season went to waste than usual. The egg, poultry and butter markets ruled unusually steady through the month, butter and poultry being in good request. The flour market was more active, prices advancing 50 cents a barrel on the average. Provisions moved quite freely, but prices were somewhat unsettled. With the seed merchants, the dry goods houses and leather dealers it was a quiet month, and the hide market was weak and

dull through the entire period. The local grain market was disappointing, and with the exception of the third week little interest shown in the cereals. The manufacturers of products from grain had a trying month, being unable to get corn or wheat at prices which left any margin on the manufactured product. The month closed with prices firm at the following range on track, as reported by the secretary of the board of Trade: Wheat-No. 2 red, 83c; No. 3 red, 80@82c; June,

82c, track.

A NEW PROFESSION.

Forest Growing Calls for Men Especially Trained.

A comparatively new profession in America, and one that offers substantial inducements to young men of special aptitudes, is that of forestry. The fact that the federal government is increasing the area of its forest preserves largely every year and that many State governments are following this laudable example suggests the overwidening field already open to students and specialists in the science of forestry. It is now generally recognized that every large forest reservation or preserve needs for its proper care and supervision a corps of men trained for this special purpose. valuable public holdings cannot be left, as they have been too often, in charge of almost any one who may be out of a job. The service calls for picked men who care enough for forestry to make it their lifework. Germany, France and other European countries have had their schools of forestry for years, and their graduates are found in charge of forest lands in every part of the old world. A praiseworthy beginning in this line of education has been made this year by Yale College. Through the benefi-cence of Mr. James W. Pinchot, a citizen of Pennsylvania, this institution has been able to establish a forest school. The school starts with an endowment of \$150,000, besides several large areas of forest land near New Haven and elsewhere for practical forest instruction. During the first year short courses of lectures will be given on state and national forestry and special lectures on forest law and lumbering. The regular course covers a period of two years. The first year's course includes the growth and production of trees and forests, the establishment of forest plantations and how to make thinnings and other classes of cuttings, while the second year is devoted to advance technical work in the classroom and in the field. All this is excellent and full of promise for the future welfare of the

Shell Builders.

Cassell's Little Folks. Let us spend a moment in considering what the inhabitants of the shells are like when they are living at home, each in his one-roomed house. They are all soft and slimy, without any bones, but otherwise they are not all similar, and the plans of their dwellings are correspondingly different. On the one hand we have those which, like the oysters and mussels, have not heads and live in a shell that is really a box with a lid. In the oyster or scallop there is no difficulty in telling which is the box and which is the lid; but in the mussel, the cockle and the clam, where one half is as deep as the other, each may in turn be looked upon as box or lid, according as it is below or above its fellow. On the other hand, however, the shell proper is all in one piece, as in the tusk shell and in any numbers of others which, like the whelk, or "softie," as the costermongers call it, are sea snails with heads and horns. An entrance must, of course, be left, and this may be closed by a little shelly door, fastened on the top of the animal's "tail." which, when the owner retires to bed, securely shuts out intruders, as in the periwinkle. In other cases where there is not this useful arrangement the front door is always opens, but often the passage is 5c; standard A, 5.60c; confectioners' A, 5.60c; made very narrow, as in the cowries, so that it is difficult for anybody but the 6.20c; powdered, 5.90c; granulated, 5.80c; owner to enter. There is one burglar, how- cubes, 5.95c. ever, who is able to prize open the lid of the oyster's strong box, be it never so firmly held down by the owner within, and who can force the doors of other shells with ease. This is the wily starfish; he fixes his myriads of sucker-like feet, some here, some there, and pulls and pulls until the lid springs up or the door flies open. Then he has oyster for supper, or periwinkle for tea, as the case may be.

ALL MARKETS DECLINED ON GEN-ERALLY FAVORABLE NEWS.

Rains in the Northwest Provoked Wheat Liquidation-Corn, Oats and Provisions on Lower Range.

CHICAGO, June 30 .- Wheat was weak today under more liquidation, caused by the Liverpool unresponsiveness and rains in the Northwest, closing 14@1%c under yesterday. Corn closed %c lower and oats %c depressed. Provisions were weak, closing 121/2c to 25c down.

Wheat was only moderately active and weak most of the session, although at the bottom the market steadied. It did not, however, show much recuperative power at any time and was devoid of features. The weak opening was because Liverpool showed no response to the advance here yesterday, and also because rains were predicted for the Northwest. This caused renewed liquidation through commission houses on moderate scale, and, as the demand was rather slack, the market slumped. European crop conditions were reported favorable. Through an error Beerbohm's report was made to show a shortage in this year's world crop of 16,000,000 bu, but a correction received later in the session made this 128,-000,000 bu. This was of influence in the market, such as it was, and made the close a bit better than the bottom. August opened unchanged to 1/2%c under yesterday, at 83@831/sc to 821/sc, and sold off early to 81c, closing 11/01%c down, at 81@811/c. Seaboard clearances in wheat and flour were equal to 212,000 bu. Primary receipts aggregated 518,000 bu, compared with 788,000 bu last year. Minneapolis and Duluth reported 328 cars, against 411 last week and 524 a year ago. Receipts here were fiftythree cars, none of contract grade.

Corn was quiet and altogether easy, early, in sympathy with wheat and under the influence of rains in parts of Kansas and on fair country offerings, but recovered later on a good shipping demand. August sold between 421/2042%c and 43c, closing %c under yesterday, at ... c. Liverpool was %d lower. The cash business amounted to 260,000 bu. Receipts were 772 cars.

The oats market needed a plaster cast, and, not having it, was rather weak. There was a fair trade, but it was mostly in the way of changing July for other options. September was about 1/2c over July. There was some liquidation of July by longs and the Northwest demand was anything but urgent. August sold between 24%c and 24%c, closing %c under yesterday, at 24%c. Receipts were 300 cars.

Provisions were quiet and weak. The wheat decline was of influence, but selling by packers who keep their reasons to themselves was the main factor. September pork sold between \$12.85 and \$12.721/2 and closed 25c under yesterday, at \$12.721/2; September lard between \$7@7.021/2 and \$6.90 closing 121/2c down, at \$6.921/2, and Septem-

ber ribs betwene \$7.07\(\frac{1}{2}\) and \$7.05, with the close 15\(\tilde{0}\)17\(\frac{1}{2}\)c depressed, at \$7.05. Estimated receipts for Monday-Wheat 100 cars; corn, 825 cars; oats, 270 cars; hogs,

Wherever Street Cars Run.

The stout man on the rear platform who

looks deep into your eyes while you are

shouting to stop the car must sometimes

ductor in you personally there is no hope

for you. He is blase on all the ordinary

yells, and a stern chase only makes him

look on you as a competitor, and he shows

you what his car can do. But a quiet little dance all by yourself attracts him, and

he will sometimes pull the bell-rope to see

guess your meaning, but though standing within whispering range of the conductor he rarely drops a hint to him about you. It does no good to hail or whistle or fling the arms about. No gleam of recognition lights up that leaden gaze. He is no mediator for man or woman, but a strict partisan of laissez faire, a fat survival of the fittest made cold and stolid by success. You simply have to wait till a car comes along, whose conductor, like Annie Laurie, has a rolling eye, and the safest way is to begin dancing on the crossing when he heaves in sight. That interests him, and unless you can interest the suburban conunless you can interest the suburban con-

SELLING AT PREVIOUS PRICES. Hogs Active at Steady to Slightly

Lower Figues-Sheep Steady-Con-

dition of Markets Elsewhere.

UNION STOCKYARDS, INDIANAPOLIS June 20 .- Cattle-Receipts, 100; shipments fair. There was a very good supply of cattle on sale for this time of the week, and will all buyers present the offerings changed hands readily enough at quotably steady prices. The arrivals were principally butcher grades, and there were none good enough to test the full strength of the market. The receipts this week show an increase of nearly 1,000, compared with iast week, and little change compared with the same week a year ago. There has been considerable uneveness in the trade this week, and rather a heavy feeling prevailed in prices for the opening to the close. For the most part salesmen succeeded in maintaining about steady prices for strictly dry fed fat cattle that were not too heavy and there was not a great deal of change in the best cow stuff. Quotations:

Good to prime steers, 1,350 lbs. and upwards......\$5.20@ 5.50 Fair to medium steers, 1,350 lbs. steers Fair to medium 1,150 to 1,300-lb Medium to good 900 to 1,100-lb Fair to medium feeding steers., 4.25@ 4.50 Common to good stockers...... 3.75@ 4.50 Good to choice heifers...... 4.10@ 4.55
Fair to medium heifers...... 3.65@ 4.00 Common to light heifers..... 3.25@ 3.50 Common old cows...... 2.00@ 3.00 Prime to fancy export bulls..... 3.90@ 4.25 Good to choice butcher bulls..... 3.25@ 3.75 Good to choice cows and calves....35.00@50.00 Common to medium cows and

Hogs-Receipts, 6,500; shipments, 1,500. The eccipts of hogs to-day show an increase of 3,000 compared with last week, and were about that much smaller than a year ago. The market opened active at steady to 2½c lower prices. All buyers were active, and the offerings changed hands in good season at the decline. With liberal receipts the beginning of the week there was a break of 71/2010c in prices, which was followed by considerably lessened supplies and naturally a rally in prices amounting to about 5c. Continued small supplies were responsible for a further gain of 10c in prices on Thursday, and this was followed by more liberal receipts, which resulted in loss of 10c, leaving the average at the close of trade Friday 5c higher than Tuesday. Quotations:

Good to choice medium and heavy\$5.221/2@5.27 Mixed and heavy packing..... 5.20 @5.229 Good to choice light weights.... 5.22 @5.274 Common to fair light weights.. 5.20 @5.224 Common to good pigs..... 3.25 Roughs 4.45 @5.00

Sheep-Receipts, 100; shipments small The receipts of sheep and lambs were a fair average for this time in the week, a trading basis was soon established, and all changed hands at steady prices compared with yesterday. The receipts this week are about 20 smaller than last week and 900 smaller than the same week a year ago. From the beginning of the week there has been rather a dull feeling in the trade and the tendency has been toward a lower level in prices. The scarcity of choice stock is largely responsible for the condition of the trade, but the markets elsewhere are in rather a demoralized state and it was hardly to be expected that the market would be satisfactory to shippers. There has been practically no demand for inferfor stock and they have had to sell at the

buyers' price. Quotations:

HOW COTTON BECOMES, SILK.

An English Dyer Who Discovered Process That Has Made Millions.

St. Louis Republic A boy sat before the fire and watched his mother's kettle boil. The lid quivered rose a little, and the boy gave steam power to the world. John Mercer, an English dyer, filtered caustic soda through a square of cotton cloth. Thence a new ver mercerize-in the language, a new fabric

gaging millions of capital, to cheer the un-The story of the boy, John Watt, is old. but Mercer's story is new and interesting. Mercerized cotton, either cotton yarn or cotton cloth, resembles silk absolutely. It has the luster of silk; it will take on, like silk, the richest and most brilliant dyes, and it has the unmistakable soft-harsh, nestling feel which nothing but silk ever had. Also cotton, under this proces, does not weaken, as might have been feared, but it acquires strength. A skein of cotton yarn in the natural state that will carry thir-teen ounces without breaking, will carry, after mercerizing, nineteen ounces. And it you take three coats and line the first with a plain cotton lining, the second with mercerized cotton and the third with silk, the cotton and the silk will wear out about to-

gether, but the mercerized lining will outlast them two or three times over.

us now only mercerized things. Mercerizing began as far back as 1846 in the English town of Accrington, where John Mercer, manager for the firm of Hargreaves, filtered caustic soda through a cotton cloth. Mercer, by accident, kept this cloth by him, happened to test its strength, happened to splash it with a dye. He found that it was about twice as strong ning a cotton thread through a liquid as cheap almost as water, it would come to do the work of two threads, and in being

the dye stuff. Mercer rejoiced. He refused for his secret an offer of \$200,000 from a French firm. found that cotton shrunk in the merceris

life the man tolled ineffectually on, and he died disheartened. But his name lives. Horace Lowe, in England, and Thomas and Provost, in Germany, began to try to see if it might not be possible to mercerize a cotton thread and to prevent the thread

Mercer had taken his cotton, steeped in for about three hours in caustic soda, then washed it. That is mercerizing in its simplest terms. To the Englishman, Lowe, and to the Germans, Thomas and Provost came simultaneously the idea of keeping the cotton stretched while steeping it is the caustic soda bath. They tied the ends of their cotton threads to sticks and then mercerized them. The sticks did not break the threads did not even show signs shrinkage. So easy was it to do what Mer-cer had been failing at for years and years. But, more than this, they found that cotton mercerized under tension came out glossy, soft and rustling. To their am ment they found that they had transfor cotton into silk. And ever since the Englishmen and the Germans have been fight-

ing over the patents on this wonderful die The explanation of the luster that cotton being mercerized, takes on is simple. The soda and the tension together change the nature of the cotton fiber. The natural fiber is flat, shriveled; the mercerized fibe fills out, becomes round and smooth. And just as a flat, dried raisin has no luster whereas the full ripe grape catches and throws back the light, so there is no luste to the flat fiber of the natural cotton, be

on the market, and a new business, en-

Mercerized cotton is used in lining, in underwear, in spindle handling, in stockings, in dress goods, in negligee shirts. There is a profit in mercerizing of from 100 to 200 per cent. In the last year or two many public dyers have added mercerizing machines to their plants, and a good number of mercerizing mills have been estab-lished. But there is room for more. Here is the proof of the demand for mercerized goods: Bradford, the ingenious and alert manufacturing town of England, ran night and day making cloths for us in the time of the low tariff. Bradford is still running night and day, but she is making for

dyed, it would save half the quantity of

He had the idea of an immense syndicate with himself at the head, rolling up lions of profit per annum. Then it w ing. A yard of cloth would save in dyestuffs and in raw stock, say 5 cents to its manufacturers, but it would come out of the mercerizing bath only three-quarters of a yard of cloth. Against the profit of cents a loss through shrinkage of about 16 cents would have to be set. That is why Mercer never formed his syndicate, why mercerizing was of no commercial importance until latterly.

For the remaining twenty years of his

That is because, somewhere around 1896 from shrinking in the process. They more than succeeded.

on the mercerized sort the light shines an is reflected just as on the grape.
